DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 3-10 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach a transmitter apparatus includes a vector control means produces the plurality of N dimensional vectors based on a propagation parameter corresponding to a propagation channel between the first radio station and the second radio station independent of other propagation channels.

Dent in view of Lei cited in a previous office action disclosed a transmitter apparatus includes a vector control means for producing a plurality of N dimensional vector between the first radio station and the second station, vector multiplexing means for producing an M number of vector-multiplexed symbol sequences multiplexed by multiplying the plurality of N dimensional vectors, and the vector control means produces the vectors such that at least one symbol sequence containing the information symbol sequence is received from among the plurality of symbol sequences and other symbol sequences are cancelled. However, Dent in view of Lei failed to teach the vector control means produces the plurality of N dimensional vectors based on a propagation parameter corresponding to a propagation channel between the first radio station and the second radio station independent of other propagation channels.

Art Unit: 2617

Therefore, claims 1 and 3-10 are allowed.
